

Time-Saving Liquor Store POS Software

Let us handle daily tasks so you can stay focused on business growth.

Excellent customer service makes your customers feel appreciated and builds repeat business. But you're responsible for managing inventory, offering purchase orders, creating promotions, and making sure your business is operating compliantly. Instead of focusing on great experiences for your customers, you may be ready to join them at Happy Hour. The good news? Our liquor store point of sale (POS) system streamlines processes and gives you more time to focus on your customers.

Automate Liquor Store Management Processes

Stock Counts and Replenishment

Use barcode labels to track inventory by the case, six-pack, or bottle, so you always know what's in stock and what you need to order. Automating inventory tracking decreases errors and helps you control shrinkage.

Pricing and Discounts

Our system allows you to create mix-and-match pricing and offer discounts while complying with local laws. You can also control profitability by seeing how much margin you make on every sale.

Age Verification

Our automated age verification process keeps lines moving and keeps customers compliant. Employees simply scan customer IDs at the checkout. Our POS system confirms age and approves the purchase quickly and easily.

Why Choose The General Store's Liquor Store POS Solutions

We know liquor stores aren't like other retail businesses, so we perfected our technological mixology to deliver exactly what you need.

✓ Third-Party Ordering Integrations

Expand your business and offer the convenience of ordering online. When your customers order from a third-party platform, you receive a notification. Then, your team can prepare the order and finalize the transaction in your POS system.

✓ Customer Management & Loyalty

Rewards programs keep customers coming back. With our flexible software, you can allow your customers to earn loyalty points and use them compliantly toward future purchases. You can also reward referrals to build your customer list.

✓ High-Risk Payment Processing

The General Store knows payment processing can be a headache for high-risk businesses. We offer customized solutions to help you control chargeback risks and keep costs low so you can confidently accept electronic payments.

✓ Labor Management

Our solution allows you to automate employee scheduling and adapt schedules to forecasted store traffic. You also have full control of access control and permissions so employees can access data and perform tasks necessary for their jobs.
