

Innovative C-Store Software

Efficiently manage your expanding business.

Convenience stores have become part grocer, part retailer, and part quick service restaurant. The most efficient way to manage a C-store is with one solution that does it all. We offer full-featured convenience store point of sale (POS) software that manages transactions across the entire operation quickly and easily—exactly how C-store customers expect. Our software also streamlines back-office processes, automating purchasing, inventory, and employee management and supporting a more profitable business.

Tailor-Made Convenience Store Solutions

Inventory Tracking

Your inventory is more diverse than almost any other type of retailer. Track a wide range of products with our flexible inventory management system that lets you quickly see stock levels and control shrinkage.

Multi-Store Management

Maintain visibility into all store locations with our convenience store software's multi-store capabilities. Our system handles up to 99 stores, enabling communications and data transfer to company headquarters.

Tobacco Scan Data Program

Easily share tobacco sales information with manufacturers and build additional revenue. Our system automatically collects and shares scan data, making it easy for your store to participate and offer brand-funded promotions.

Why Choose Our C-Store Solutions

We offer proven solutions to common C-store challenges and work with you to address your unique pain points.

Vendor Management

As your business adds products and expands to new offerings like made-to-order foods, you need software that simplifies vendor management. Leverage our software to keep track of purchase orders, invoices, and shipments from a centralized system.

Customer Management

Use our software to engage customers and build their loyalty with rewards and tailored promotions. Analyze data from our convenience store software to understand customer behaviors and deliver the products, services, and experiences they want.

Payment Processing

Increase convenience by accepting a range of payment methods. Our solutions include an integrated omnichannel payment solution that accepts all payment methods, including contactless, mobile wallet, ACH, and EBT, on various POS devices.

Labor Management

Automate employee management and time tracking to save time and optimize schedules. You can also use data from our software to forecast store traffic so you have enough employees to handle demand while limiting overtime and high labor costs.
